Green... It's Clean.....

Like to make a design statement and save the environment with a toilet you need to use everyday?

The miniLoo toilet is perfect for that small space. It's off the floor orientation, compact, and wheelchair accessible. The miniLoo is manufactured from environmentally-friendly recycled stainless steel that can help in reducing the carbon build-up in your bathroom.

At its base, the miniLoo utilizes a dual flush European in-wall tank mechanism to reduce water consumption by allowing the user to choose between a 1.0 gallon flush for liquids and a 1.6 gallon flush for solids.

Available in a high-polish mirror and a White Gloss durable powder coating. The miniLoo is available separately in all 3 finish selections. Toilet seats are sold
