

INSTALLATION INSTRUCTIONS INSTALLING FLUSH TANK TO TOILET BOWL

- A- For toilet bowl installation see drawing number 9935-010-001.
- B- Place rubber gasket ① on center of flush inlet ② making sure rounded inner edge is on top.
- C- Set cistern tank ⑧ on top of rubber gasket ①, making sure screws ③ line up with anchoring points ④ on both sides. (See Detail A)
- D- Tighten screws ③ evenly all around until rubber gasket ① makes watertight seal (see Detail A), and tank is level and does not wobble.

- E- After thoroughly flushing the supply line make up supply connection ⑤ to refill valve ⑥ (see Detail B), tighten 1/4 turn beyond hand tight, do not over tighten.
- F- Turn on water supply ⑦ and check for water leaks.

NOTE: See appropriate Fluidmaster, Inc.® installation instructions included for proper supply seal application, and flush time adjustments.
