

INSTALLATION INSTRUCTIONS
INSTALLING NEO-COMBY:

NOTE: Instructions for -AL and -AR angled toilets only.

NOTE: Installation of toilet waste connection is comparable to china units.

- A- Center line of closet flange waste connection ① should be 10" from finished wall, flush with finished floor, and 3" off of centerline of fixture, side opposite toilet.
- B- Clean any construction debris out of floor flange, then install the mounting bolts ② into the side slots of floor flange.
- C- Place wax ring ③ centered on top of floor flange ①, pressing firmly into place.
- D- Remove lavy bowl ④ from comby housing.

- E- Lift comby and set onto floor flange ①, making sure the mounting bolts ② go through mounting holes in toilet waste flange. Apply pressure evenly all around toilet flange to ensure proper seal.
- F- Make up toilet tank supply connection ⑦. Adjust tank filling and flushing to desired operation.
- G- Loosely anchor unit to wall through 5/8" x 1" mounting slots ⑤. Hardware by others. Access is through the top of the fixture and the access panel on the toilet side of the fixture.
- H- Replace lavy bowl ④ onto comby housing. Tighten wall anchoring hardware.
- I- Make up lavy waste connection ⑥, gaining access through the side access panel.
- J- Install spout by others.
