

## Neo-Metro's Cast Resin Color Matching Procedure

1. Client must send Neo-Metro a suitable color sample to match. This can either be a *Pantone* color number or an actual sample of the color to be matched. The *Pantone* color matching system is available online at Pantone.com. Please be advised that Neo-Metro cannot always match the color exactly due to opacity or color restraints. In addition, the color to be matched must be a solid color.
2. Client will sign this agreement below and send in the one-time fee of \$600. This color matching does not go into effect until the payment has been received. Please send a signed PDF document to your Neo-Metro sales. A copy of this agreement will be maintained in your file.
3. Upon receipt of the color, Neo-Metro will create 2 (two) samples of cast resin blocks of the desired color. They will be 5" x 3" x 2" in size. Neo-Metro will cut each sample block in half. One half will be sent to the client using 2<sup>nd</sup> day priority shipping for tracking reasons. The other half will remain with Neo-Metro in the client's file. Each color sample is marked clearly with either an (A) or (B) block. The entire time frame on the color matching process is approx. 2 weeks.
4. Upon the approval from the client in writing as to which sample to use (A) or (B), Neo-Metro will start the production process on the Ebb Concept. Please note that the entire Ebb Concept's lead-time does not go into effect until the color sample is decided upon.
